

PRODUCT DISCONTINUATION

Softing Industrial Automation GmbH

Product family: FG-1xx Hardware

Dear customer,

this is to inform you about the discontinuation of our **FG-1xx** hardware and software products to be effective by **31.12.2017**. All products listed in the appendix are going to be discontinued by this date.

If you should still require any of the listed **FG-1xx** products, we offer you the possibility of a last buy with a procedure as described below:

- Please place an order for the required **FG-1xx** components latest by **31.12.2016**. All incoming orders will be collected until this deadline to optimize a possible last manufacturing process.
- We will check the delivery possibilities until **31.01.2017** and send an acceptance of order. The possibility of delivery depends on the number of components required by our customers. In the case that a last manufacturing process should not be feasible any more due to technical or commercial reasons, we will inform you and try to find a solution. If a solution cannot be found, we reserve the right to decline the order.
- The estimated delivery date will be announced with the acceptance of order.
- Components, which are available from stock, will be delivered right away.
- Components, which have to be assembled in the last manufacturing process, will be delivered at the estimated delivery date announced in the acceptance of order.

The regular product maintenance of the **FG-1xx** software will be ceased by **31.12.2017**. Maintenance work due to guarantee claims will be performed independent from that date according to the legal regulations.

If you should still require **FG-1xx** software maintenance or extensions in future, we will try to offer you appropriate services on project base depending on our possibilities.

We will continue to offer **FG-1xx** hardware repair on request depending on our possibilities and on the availability of hardware components.
