Release Notes

dataFEED Exporter

Version 1.44

April 2024

Product	Deliverable	Version	Date
dataFEED Exporter	dataFEEDEXporter_v1.44.exe	1.44	17.04.2024

1. New or enhanced features

- Support for Siemens TIA 19

- Support for Siemens SINUMERIK 840D and ONE

- The latest version first

- A version starts with 1. New or enhanced features – right click on the number and select "Start new with 1"

2. Fixed issues

- ID 198/203/204: Comments are not exported correctly

- ID 199/205: Offsets are not correctly exported

- ID 205: Offset of UDTs are not exported correctly

- ID 210: Export is extremely slow

3. Known issues

- ID 113: System sometimes needs restart after installation of DF Exporter

- ID 135: The DF Exporter in run mode remain open after the upgrade/remove actions was done

- ID 142: No upgrade dialog appears, that the setup will perform an upgrade of the Exporter data

- ID 143: Application can be opened many times without warning that the app is already running

- ID 149: Changes are not kept when walkthrough the wizards using Next and Back buttons

- ID 162: Read/Write Attributes are not displayed correctly

- ID 169: Uninstallation work not correctly at Windows Server 2022

Product	Deliverable	Version	Date
dataFEED Exporter	dataFEEDEXporter_v1.43.1.exe	1.43.1	12.09.2023

1. Fixed issues

- ID 200: TIA18 projects cannot be exported to the V1.43 dataFEED Exporter

2. Known issues

- ID 113: System sometimes needs restart after installation of DF Exporter
- ID 135: The DF Exporter in run mode remain open after the upgrade/remove actions was done
- ID 142: No upgrade dialog appears, that the setup will perform an upgrade of the Exporter data
- ID 143: Application can be opened many times without warning that the app is already running
- ID 149: Changes are not kept when walkthrough the wizards using Next and Back buttons
- ID 162: Read/Write Attributes are not displayed correctly
- ID 169: [Command Line Exporter] Not possible to extract commands from some datatypes

Product	Deliverable	Version	Date
dataFEED Exporter	dataFEEDEXporter_v1.43.exe	1.43	09.08.2023

1. New or enhanced features

- TIA 18 Support

- ID 173: Possibility to check the tick boxes with "space bar" on keyboard

- ID 174: Possibility to select a group of items

- ID 175: Display Item Syntax in overview table

- ID 177: Possibility to search for an item

- ID 178: Import Comments from s7-alias files and from s7 projects

- ID 185: Administrator rights are no longer required

2. Fixed issues

- ID 171: Hierarchical structur of s7-alias-file is not taken over correctly

- ID 181: Item Suffix "BA" is not taken into account by Exporter

- ID 186: Comments of Input and Output variables are not correctly exported

- ID 187: Date&Time data types are incorrectly exported

3. Known issues

- ID 113: System sometimes needs restart after installation of DF Exporter

- ID 135: The DF Exporter in run mode remain open after the upgrade/remove actions was done

- ID 142: No upgrade dialog appears, that the setup will perform an upgrade of the Exporter data

- ID 143: Application can be opened many times without warning that the app is already running

- ID 149: Changes are not kept when walkthrough the wizards using Next and Back buttons

- ID 162: Read/Write Attributes are not displayed correctly

- ID 169: [Command Line Exporter] Not possible to extract commands from some datatypes

Product	Deliverable	Version	Date
dataFEED Exporter	dataFEEDEXporter_v1.42.0.exe	1.42.0	21.04.2022

1. New or enhanced feature

- TIA 17 Support

- Support of Windows 11, Windows Server 2019, Windows Server 2022

- Added edgeConnector products path

2. Fixed issues

- **ID 169:** [Command Line Exporter] Not possible to extract commands from some datatypes

- **ID 170:** Exporter crashes during the load process of Step7 projects

- **ID 180, ID 183:** Access permissions are not exported correctly

- **ID 184:** System Blocks Folder tags are not correctly exported

3. Known issues

- **ID 46:** Uninstall do not remove link in start menu

- **ID 113:** System sometimes needs restart after installation of DF Exporter

- **ID 135:** The DF Exporter in run mode remain open after the upgrade/remove actions was done

- **ID 137:** Setup version is not shown in setup name or when the application is installed

- **ID 142:** No upgrade dialog appears, that the setup will perform an upgrade of the Exporter data

- **ID 143:** Application can be opened many times without warning that the app is already running

- **ID 155:** Counter and Timer data types not selectable in the drop-down menu

- **ID 162:** Read/Write Attributes are not displayed correctly

- **ID 164:** datatype "String" is missing in drop-down menu

- **ID 169:** [Command Line Exporter] Not possible to extract commands from some datatype

Product	Deliverable	Version	Date
dataFEED Exporter	dataFEEDEXporter_v1.30.0.exe	1.30.0	29.03.2021

1. New or enhanced feature

- TIA 16 Support

2. Fixed Issues

- ID 159: Exporter crashes after adding additional variables

- ID 160: Setup file was not signed with Softing certificate

- ID 161: Exporter cannot export Sinumerik project with TIA15.1

3. Known issues

- ID 46: Uninstall do not remove link in start menu

- ID 113: System sometimes needs restart after installation of DF Exporter

- ID 135: The DF Exporter in run mode remain open after the upgrade/remove actions was done

- ID 137: Setup version is not shown in setup name or when the application is installed

- ID 142: No upgrade dialog appears, that the setup will perform an upgrade of the Exporter data

- ID 143: Application can be opened many times without warning that the app is already running

- ID 155: Counter and Timer data types not selectable in the drop-down menu

- ID 162: Read/Write Attributes are not displayed correctly

- ID 164: datatype "String" is missing in drop-down menu

Product	Deliverable	Version	Date
dataFEED Exporter	dataFEEDEXporter_v1.**22.0**.exe	**1.22.0**	10.01.2019
dataFEED Exporter	dataFEEDEXporter_v1.**22.1**.exe	**1.22.1**	22.08.2019
dataFEED Exporter	dataFEEDEXporter_v1.22.2.exe	1.22.2	12.12.2019

1. New or enhanced feature

- TIA 15.1 Support

- Adjustable window size/fullscreen mode

- Displaying of comments

2. Fixed issues

- ID 134: Edit tag from Struct to any other data type is possible without errors (patch1)

- ID 136: Wrong import (false items like WT data/struct array)

- ID 138: import of text files results in folder only objects (patch1)

- ID 139: Only visible in HMI engineering is not working correctly

- ID 140: Arrays with constants contains wrong offsets

- ID 144: STEP7 project - datatype DINT is exported as INT from symbol table (patch1)

- ID 145: Import from instance DB with address 32000 incorrect -> broken sdfi file (patch1)

- ID 146: The optimized data block flag was wrong exported with the value TRUE, even in TIA Project is FALSE (patch1)

- ID 151: Update Help Documentation for "PLC Alias file syntax" (patch1)

- ID 157: Crash in exporter when you add an item under DB_KANAL1 (patch2)

3. Known issues

- ID 46: Uninstall don't remove link in start menu

- ID 113: System sometimes needs restart after installation of DF Exporter

- ID 135: The DF Exporter in run mode remain open after the upgrade/remove actions was done

- ID 137: Setup version isn't shown in setup name or when the application is installed

- ID 142: No upgrade dialog appears, that the setup will perform an upgrade of the Exporter data

- ID 143: Application can be opened many times without warning that the app is already running

Product	Deliverable	Version	Date
dataFEED Exporter	dataFEEDEXporter_v1.21.0.exe	1.21.0	24.10.2018

1. Fixes issues

- ID 100: When "Only visible in HMI engineering" is checked, the Node "STEP 7 classic symbols" is checked too even if the HMI Visible attribute in TIA is false

- ID 118: Some help topics aren't correct linked to application wizard pages

- ID 128: dataFEED Exporter cannot export the data tags with name "Temp"

- ID 129: Wrong encoding/decoding of special characters

- ID 130: TIA Portal V15 is not detected on 64-bit German machine

- ID 131: After checking and unchecking the "Only visible in HMI engineering" checkbox the check status of the ProgramBlockFolder was changed to partial selection

- ID 132: Upgrade DF Exporter: Both DF Exporter versions are shown in Control Panel

2. Known issues

- ID 46: Uninstall don't remove link in start menu

- ID 113: System sometimes needs restart after installation of DF Exporter

- ID 134: Filtering data: Edit tag from Struct to any other data type is possible without errors

- ID 135: The DF Exporter in run mode remain open after the upgrade/remove actions was done

- ID 137: Setup version isn't shown in setup name or when the application is installed

- ID 142: No upgrade dialog appears, that the setup will perform an upgrade of the Exporter data

- ID 143: Application can be opened many times without warning that the app is already running

Product	Deliverable	Version	Date
dataFEED Exporter	dataFEEDEXporter_v1.20.0.exe	1.20	04.06.2018
dataFEED Exporter	dataFEEDEXporter_v1.20.1.exe	1.20	10.08.2018

1. New or enhanced features

- TIA 14 SP1 + TIA V15 Support

- Edit existing .sdfi files & Add/Remove symbols from existing .sdfi files

- Generate new .sdfi file from scratch

- One Setup for two applications 32bit (TIA13) / 64bit (TIA14/15)

- Improved import speed of huge projects

- HMI visible only symbols can be ignored

- Improved user interface like tooltips etc.

2. Fixed issues

- ID 65: Exporter does not work if TIA13 and TIA14 is installed on the same system

- ID 72: Exporter v1.10 crashes on Win7 x64 as standard user

- ID 77: PLC Alias Syntax expect defined nodes

- ID 78: Exporter needs long time for huge projects

- ID 85: Exporter ignores HMI visible only symbols

- ID 90: Exporter doesn't create desktop shortcut

- ID 94: Warning: "No TIA Portal installed on this machine" appear with *ap13 project

- ID 95: DF Exporter crash by pressing cancel button

- ID 96: Cannot export projects made via TIA V14 and V15 even both TIA Portals are installed on the same machine and both TIA have support for x64 platform

- ID 103: dataFEED Exporter folder is not removed after uninstalling

- ID 119: German chars (ÄÖÜ) are not imported in DF OPC Suite (patch1)

- ID 120: Treelist filter tooltips aren't updated if the language is changed (patch1)

- ID 121: Unclear start page for new customers (patch1)

- ID 122: Exporter crash while importing customer sdfi file (patch1)

- ID 123: Review <access to optimized blocks> tooltip (correct the logical value) (patch1)

- ID 124: Additional help for adding/removing symbols manually (patch1)

- ID 125: Exporter can't export devices if they are in subgroup (patch1)

- ID 126: No notice is shown at performing an upgrade (patch1)

- ID 127: dataFEED Exporter appear two times in Control Panel after upgrade is done (patch1)

3. Known issues

- ID 46: Uninstall don't remove link in start menu

- ID 113: System sometimes needs restart after installation of DF Exporter

- ID 134: Filtering data: Edit tag from Struct to any other data type is possible without errors

- ID 135: The DF Exporter in run mode remain open after the upgrade/remove actions was done

- ID 137: Setup version isn't shown in setup name or when the application is installed

- ID 142: No upgrade dialog appears, that the setup will perform an upgrade of the Exporter data

- ID 143: Application can be opened many times without warning that the app is already running
