

dataFEED OPC Suite Extended

Secure and Reliable All-in-One Solution for OPC Communication and IoT Cloud Connectivity

- Access to process and diagnostic data in controllers of leading manufacturers, including Siemens, Rockwell (Allan Bradley), B&R, Mitsubishi
- Flexible and simple manipulation of the data, including LUA script support
- MQTT and REST gateway for integrating production data in IoT Cloud and Big Data solutions, e.g. Microsoft Azure, Amazon AWS and Siemens MindSphere
- Easy to use

Simple and Independent Access to Controllers and IoT Devices

- Use without modifying control program
- Integration of non-OPC UA-capable components, such as Siemens S7 controllers, into OPC UA solutions
- Cost savings through further use of already existing OPC Classic components
- Gateway functionality for connecting controllers and components with integrated OPC UA Server to OPC Classic applications
- Direct connection of IoT devices (MQTT Publisher) without using an MQTT Broker

Gateway to Big Data and IoT Clouds Solutions

- Integration of automation devices via MQTT Publisher/Subscriber and REST Client functionality in IoT cloud applications, e.g. Siemens MindSphere, Amazon AWS or Microsoft Azure
- Easy integration of production data into NoSQL Big Data storage solutions such as MongoDB
- State-of-the-Art security by SSL/TLS support, including certificates
- Protection against data loss through Store & Forward for OPC, MQTT and REST

Extensive and flexible data processing

- Data conversions of values, e.g. conversion from Celsius to Fahrenheit
- Varied logical operation such as extraction of bits from an integer
- Extensive data type conversion options
- Comprehensive and complex data preprocessing through the support of LUA scripts
- Data exchange between different automation worlds (e.g. between Siemens and Rockwell controls) without changing the control program

Easy Configuration

- Modern, intuitive graphical user interface for fast OPC communication configuration
- Use of smart hands-on defaults, setup wizards and drag-and-drop support
- Effective and efficient configuration of distributed automation systems with many OPC UA and OPC Classic Servers
- Easy industrial communication by avoiding DCOM and its complex security settings on the OPC Server and OPC Client side
