## 启动和运行

不要在有潜在危险的地方打开电池盒。

插入电池，打开 mobiLink 并等待 5 秒钟，直至设备启动。mobiLink 的运行条件是必须在 Windows PC、平板电脑或智能手机上使用类似于 FDT 框架应用程序的管理工具或配置工具。

有关安全要求、如何设置 USB 和蓝牙通信以及如何配置现场总线和 HART 连接的详细信息，请参阅用户指南。

在启动过程中，mobiLink 将会尝试根据连接的现场总线来验证操作模式。如果现场总线端子被连接到运行中的 4-20 mA 链路，则会损害模拟过程值。确保使用正确的连接和模式。

## 安全

mobiLink 只能由合格的人员操作。为确保人员和设备的安全，必须按照预期用途和当地的法律法规使用 mobiLink。有关安全要求和法规，另请参阅用户指南。

确保 mobiLink 的电气参数与现场总线的安装相匹配。不要在危险区域使用 USB 连接到你的主机设备。

## 运输和维护

在运输时应从设备上卸下电池，以确保对 mobiLink 进行机械固定，以防止其意外接通。定期用湿布擦拭外壳。请勿使用研磨剂或溶剂。请勿在危险区域内清洁设备！mobiLink 不包含可由用户维修的零件。禁止对设备进行改装或维修。操作人员负责产品的运输和维护。

## 防爆

mobiLink 设计用于潜在的爆炸性环境，符合 1 区/2 区的分类。它被批准在爆炸组 IIC 中使用，温度等级为 T4。确保 mobiLink 只能在符合当地安全规定的情况下使用，以便在潜在的爆炸性环境中安装电气设备。更多信息，请参考用户手册。

只能使用经批准的 Energizer E91 或 Duracell Procell MN1500 型电池。使用未经批准的电池类型将使防爆认证失效。请不要在有潜在危险的地方使用 USB 接口！

# Getting started

Read this quick guide before you unpack and install mobiLink. Scan the QR Code on the back page to download the related **User Guide** before you operate the device.

## Unpacking your mobiLink

1. Take the device and the accessory parts out of the box and save the box and packing material.
2. Verify that the following items are contained undamaged:
  - ✓ mobiLink device
  - ✓ USB cable (2m)
  - ✓ red and black testing cables with clamp
  - ✓ 3 AA batteries

## Setting up your mobiLink

1. Download the *MOBILINKdtm* or the *Communication Configuration Tool* from the product website depending on your use case (scan the QR code).
2. Double-click the setup file to start the installation.
3. Select the installation language.
4. Follow the install wizard instructions.
5. Read the **User Guide** available for download.

## Startup and Operation

Do not open the battery compartment in potentially hazardous areas.

Insert the batteries, switch on mobiLink and wait 5 seconds until the device has started. The operation of mobiLink requires the use of management tools like FDT frame applications or configuration tools on Windows PCs or tablets or smartphones.

See the **User Guide** for safety requirements and details on how to set up a USB and Bluetooth communication and how to configure the fieldbus and HART connection.

During startup mobiLink tries to verify the operation mode against the connected fieldbus. If fieldbus terminals are connected to an operating 4-20 mA link this will compromise the analog process value. Make sure to use the correct connections and mode.

## Safety

mobiLink must be operated by qualified personal only. To ensure the safety of personnel and equipment, mobiLink must be used as intended and in accordance with local laws and regulations. See also the **User Guide** for safety requirements and regulations.

Ensure that the electrical parameters of mobiLink match the fieldbus installation. Do not use a USB connection to your host device in hazardous areas.

## Transport and Maintenance

Remove the batteries for transport from the device to ensure that mobiLink is mechanically secured against being switched on inadvertently. Periodically wipe the housing with a damp cloth. Do not use abrasives or solvents. Do not clean the device inside hazardous areas! mobiLink does not contain user serviceable parts. No modifications or repair on the device are allowed.

## Explosion protection

mobiLink has been developed for use in hazardous areas, classified as Zone 1/Zone 2. It is approved for explosion group IIC and temperature Class T4. Make sure that you use mobiLink only in compliance with local safety requirements for installation of electrical equipment in explosive atmospheres. See the **User Guide** for details.

Use only approved batteries of type Energizer E91 or Duracell Procell MN1500. The use of a non-approved battery type will void the Ex approval. Do not use the USB interface in potentially hazardous areas!
