Release Notes

dataFEED Exporter

Release 1.42.0

1 Product and components

Product/Component	File name	Version	Date
dataFEED Exporter	dataFEEDExporter_v1.42.0.exe	1.42.0.24549	21.04.22

2 New or enhanced feature

❑ TIA 17 Support

❑ Support of Windows 11, Windows Server 2019, Windows Server 2022

❑ Added edgeConnector products path

3 Bug Fixes

❑ **ID 169:** [Command Line Exporter] Not possible to extract commands from some datatypes

❑ **ID 170:** Exporter crashes during the load process of Step7 projects

❑ **ID 180, ID 183:** Access permissions are not exported correctly

❑ **ID 184:** System Blocks Folder tags are not correctly exported

4 Known issues/limitation

❑ **ID 46:** Uninstall do not remove link in start menu

❑ **ID 113:** System sometimes needs restart after installation of DF Exporter

❑ **ID 135:** The DF Exporter in run mode remain open after the upgrade/remove actions was done

❑ **ID 137:** Setup version is not shown in setup name or when the application is installed

❑ **ID 142:** No upgrade dialog appears, that the setup will perform an upgrade of the Exporter data

❑ **ID 143:** Application can be opened many times without warning that the app is already running

❑ **ID 155:** Counter and Timer data types not selectable in the drop-down menu

❑ **ID 162:** Read/Write Attributes are not displayed correctly

❑ **ID 164:** datatype "String" is missing in drop-down menu

❑ **ID 169:** [Command Line Exporter] Not possible to extract commands from some datatypes

1 Product and components

Product/Component	File name	Version	Date
dataFEED Exporter	dataFEEDExporter_v1.30.0.exe	1.30.0.23932	29.03.21

2 New or enhanced feature

❒ TIA 16 Support

3 Bug Fixes

❒ **ID 159:** Exporter crashes after adding additional variables

❒ **ID 160:** Setup file was not signed with Softing certificate

❒ **ID 161:** Exporter cannot export Sinumerik project with TIA15.1

4 Known issues/limitation

❒ **ID 46:** Uninstall do not remove link in start menu

❒ **ID 113:** System sometimes needs restart after installation of DF Exporter

❒ **ID 135:** The DF Exporter in run mode remain open after the upgrade/remove actions was done

❒ **ID 137:** Setup version is not shown in setup name or when the application is installed

❒ **ID 142:** No upgrade dialog appears, that the setup will perform an upgrade of the Exporter data

❒ **ID 143:** Application can be opened many times without warning that the app is already running

❒ **ID 155:** Counter and Timer data types not selectable in the drop-down menu

❒ **ID 162:** Read/Write Attributes are not displayed correctly

❒ **ID 164:** datatype "String" is missing in drop-down menu

1 Product and components

Product/Component	File name	Version	Date
dataFEED Exporter	dataFEEDExporter_v1.22.0.exe	1.22.0.0	10.01.19
dataFEED Exporter	dataFEEDExporter_v1.22.1.exe	1.22.1.0	22.08.19
dataFEED Exporter	dataFEEDExporter_v1.22.2.exe	1.22.2.0	12.12.19

2 New or enhanced features

❒ TIA 15.1 Support

❒ Adjustable window size/fullscreen mode

❒ Displaying of comments

3 Bug Fixes

❒ **ID 134:** Edit tag from Struct to any other data type is possible without errors (patch1)

❒ **ID 136:** Wrong import (false items like WT data/struct array)

❒ **ID 138:** import of text files results in folder only objects (patch1)

❒ **ID 139:** Only visible in HMI engineering is not working correctly

❒ **ID 140:** Arrays with constants contains wrong offsets

❒ **ID 144:** STEP7 project - datatype DINT is exported as INT from symbol table (patch1)

❒ **ID 145:** Import from instance DB with address 32000 incorrect -> broken sdfi file (patch1)

❒ **ID 146:** The optimized data block flag was wrong exported with the value TRUE, even in TIA Project is FALSE (patch1)

❒ **ID 151:** Update Help Documentation for "PLC Alias file syntax" (patch1)

❒ **ID 157:** Crash in exporter when you add an item under DB_KANAL1 (patch2)

4 Known issues/limitation

❒ **ID 46:** Uninstall don't remove link in start menu

❒ **ID 113:** System sometimes needs restart after installation of DF Exporter

❒ **ID 135:** The DF Exporter in run mode remain open after the upgrade/remove actions was done

❒ **ID 137:** Setup version isn't shown in setup name or when the application is installed

❒ **ID 142:** No upgrade dialog appears, that the setup will perform an upgrade of the Exporter data

❒ **ID 143:** Application can be opened many times without warning that the app is already running

1   Product and components

Product/Component	File name	Version	Date
dataFEED Exporter	dataFEEDExporter_v1.21.0.exe	1.21.00	24.10.18

2   Bug Fixes

☐ **ID 100:** When "Only visible in HMI engineering" is checked, the Node "STEP 7 classic symbols" is checked too even if the HMI Visible attribute in TIA is false

☐ **ID 118:** Some help topics aren't correct linked to application wizard pages

☐ **ID 128:** dataFEED Exporter cannot export the data tags with name "Temp"

☐ **ID 129:** Wrong encoding/decoding of special characters

☐ **ID 130:** TIA Portal V15 is not detected on 64-bit German machine

☐ **ID 131:** After checking and unchecking the "Only visible in HMI engineering" checkbox the check status of the ProgramBlockFolder was changed to partial selection

☐ **ID 132:** Upgrade DF Exporter: Both DF Exporter versions are shown in Control Panel

3   Known issues/limitation

☐ **ID 46:** Uninstall don't remove link in start menu

☐ **ID 113:** System sometimes needs restart after installation of DF Exporter

☐ **ID 134:** Filtering data: Edit tag from Struct to any other data type is possible without errors

☐ **ID 135:** The DF Exporter in run mode remain open after the upgrade/remove actions was done

☐ **ID 137:** Setup version isn't shown in setup name or when the application is installed

☐ **ID 142:** No upgrade dialog appears, that the setup will perform an upgrade of the Exporter data

☐ **ID 143:** Application can be opened many times without warning that the app is already running

1 Product and components

Product/Component	File name	Version	Date
dataFEED Exporter	dataFEEDExporter_v1.20.00.exe	1.20.00	04.06.18
dataFEED Exporter	dataFEEDExporter_v1.20.1.exe	1.20.10	10.08.18

2 New or enhanced features

❑ TIA 14 SP1 + TIA V15 Support

❑ Edit existing .sdfi files & Add/Remove symbols from existing .sdfi files

❑ Generate new .sdfi file from scratch

❑ One Setup for two applications 32bit (TIA13) / 64bit (TIA14/15)

❑ Improved import speed of huge projects

❑ HMI visible only symbols can be ignored

❑ Improved user interface like tooltips etc.

3 Bug Fixes

❑ **ID 65:** Exporter does not work if TIA13 and TIA14 is installed on the same system

❑ **ID 72:** Exporter v1.10 crashes on Win7 x64 as standard user

❑ **ID 77:** PLC Alias Syntax expect defined nodes

❑ **ID 78:** Exporter needs long time for huge projects

❑ **ID 85:** Exporter ignores HMI visible only symbols

❑ **ID 90:** Exporter doesn't create desktop shortcut

❑ **ID 94:** Warning: "No TIA Portal installed on this machine" appear with *ap13 project

❑ **ID 95:** DF Exporter crash by pressing cancel button

❑ **ID 96:** Cannot export projects made via TIA V14 and V15 even both TIA Portals are installed on the same machine and both TIA have support for x64 platform

❑ **ID 103:** dataFEED Exporter folder is not removed after uninstalling

❑ **ID 119:** German chars (ÄÖÜ) are not imported in DF OPC Suite (patch1)

❑ **ID 120:** Treelist filter tooltips aren't updated if the language is changed (patch1)

❑ **ID 121:** Unclear start page for new customers (patch1)

❑ **ID 122:** Exporter crash while importing customer sdfi file (patch1)

❑ **ID 123:** Review <access to optimized blocks> tooltip (correct the logical value) (patch1)

❒ **ID 124:** Additional help for adding/removing symbols manually (patch1)

❒ **ID 125:** Exporter can't export devices if they are in subgroup (patch1)

❒ **ID 126:** No notice is shown at performing an upgrade (patch1)

❒ **ID 127:** dataFEED Exporter appear two times in Control Panel after upgrade is done (patch1)

4   Known issues/limitation

❒ **ID 46:** Uninstall don't remove link in start menu

❒ **ID 113:** System sometimes needs restart after installation of DF Exporter

❒ **ID 134:** Filtering data: Edit tag from Struct to any other data type is possible without errors

❒ **ID 135:** The DF Exporter in run mode remain open after the upgrade/remove actions was done

❒ **ID 137:** Setup version isn't shown in setup name or when the application is installed

❒ **ID 142:** No upgrade dialog appears, that the setup will perform an upgrade of the Exporter data

❒ **ID 143:** Application can be opened many times without warning that the app is already running
