

Release Notes

smartLink SW-HT

Version 1.40

August / 2023

1 Release History

V1.40.0	04.08.2023
Features: <ul style="list-style-type: none"> • Support for Siemens ET 200iSP remote I/Os and HART modules • Support for Turck excom remote I/Os and HART modules • Support for additional HART modules for the Siemens ET 200SP HA remote I/O Maintenance: <ul style="list-style-type: none"> • Improvements of the live list page of the integrated webserver 	
V1.30.0	27.03.2023
Features: <ul style="list-style-type: none"> • Support for Siemens ET 200SP, ET 200SP HA and ET 200M remote I/Os and HART modules • Added support for smartLink SW-HT to the smartLink DTM to allow FDT applications using the smartLink SW-HT Maintenance: <ul style="list-style-type: none"> • Fixed CVE-2022-48192 and CVE-2022-48193 	
V1.20.0	12.07.2022
Features: <ul style="list-style-type: none"> • Support for R.Stahl IS1+ remote I/Os and HART modules • Bug fixes 	
V1.12.0	08.04.2022
Features: <ul style="list-style-type: none"> • Support for Allen-Bradley 1715 Redundant I/O • Support for additional HART modules for the 1756 ControlLogix controller, 1734 Point I/O and 1719 Ex-I/O • Bug fixes 	
V1.11.0	18.11.2021
Features: <ul style="list-style-type: none"> • Prioritize HART communication for HART-IP requests over internal created HART requests • Allow CIP Path addressing to include ControlNet path • Bug fixes 	

V1.10.0

13.08.2021

Features:

- Support for Allen-Bradley HART modules for the 1756 ControlLogix controller and the following remote I/Os: 1734 Point I/O, 5094 Flex 5000 I/O and 1719 Ex-I/O
- Allow CIP Path addressing for accessing Allen-Bradley HART modules
- Add additional level for controller and remote I/Os in HART-IP representation
- Support use in standard Docker containers
- Changed Linux distribution of VMs to Debian

V1.00.0

08.09.2020

First release of smartLink SW-HT

Features:

- Schneider Electric M580 support
- HART-IP Server interface
